M

U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04)

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On page 7, line 15–16, the recitation "The hardness of the lip could be 60 SHORE D with the cup being 80-95 SHORE A" is misleading since 60 Shore D has a greater hardness value than 80-95 Shore A, and in view of page 7, line 8 requiring a softer lip.

Appropriate correction is required.

Claim Objections

Claims 1-8 are objected to because of the following informalities:

The limitation requiring the lip to be of a harder material in the last line of claim 1 should be amended in view of the specification requiring the lip to be of a softer material (see Spec page 4, lines 15-17). Claims 2-8 depend from claim 1 and are likewise objected to.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Williams, U.S. 4,317,408.

Regarding claim 1, as best understood by the Examiner, Williams discloses an elongated, hollow sleeve (29,18) having a having a bell-shaped portion (19,22) the first end and a tubular portion (29) surrounding the second opening; the bell-shaped portion (22) having an outer diameter adapted to be (fig 6) slightly less than the inner diameter (24) of the pipe; a lip (14 at 22) being constructed of an elastomeric material of a lower density and harder material than the sleeve (col. 4, lines 3-13).

Allowable Subject Matter

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, and if rewritten to overcome the objections set forth in this Office action.

The prior art of record does not disclose or suggest all the claimed subject matter including the sleeve and lip are constructed from polyurethane.

The prior art of record does not disclose or suggest all the claimed subject matter including a metal sleeve disposed in the elastomer sleeve disposed within the second opening.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Thompson whose telephone number is 571 272-7037. The examiner can normally be reached on 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
